

## - IV - AMENDED DRAWINGS

Under 37 CFR 1.121 (d)

*Amended drawings 05/26/06*

## NEW SHEET 1/2

On immediate anterior figure 1

- a) cancelation of the flanges
- b) cancelation of back to back membranes
- c) correction of the indices mistakes

Cancelation of the figures 2, 3, 4, 5, 6, 7

Change of indices

A handwritten '2a' is enclosed within a hand-drawn circle.

Addition in figure 1 of the former coils 72 (see former figure 1) and former dipole 142 (see former figure 43), generating magnetic field

Insertion of the former figure 35 showing the actuating membrane, with active indices.

## NEW SHEET 2/2

Addition of a figure 6 showing a very thin flat folding in the form of a narrow line.

This very thin folding is the limit of the alternately concave-convex distortions of a concave membrane.
